WORK EXPERIENCE:

Frontend Developer

Mangotech Solutions

09/2024 - 08/2026 | Karachi

- Translated 35+ reusable UI components and interactive workflows, contributing to higher user engagement and improved platform usability
- Integrated 10+ Material UI charts to display data according to business requirements
- Centralized application state management using Redux and Zustand across 15+ screens
- Integrated Google Analytics, event tracking, and video analytics, enabling 10+ tracked events
- Enhanced navigation structure across 35+ client-side interfaces and admin dashboards

React JS Developer

GE Solutions

09/2023 - 07/2024 | Karachi

- Translated 20+ Figma designs into reusable React components, achieving 95%+ mobile usability scores and consistent cross-device performance, reducing development time for future projects
- Integrated 30+ REST APIs using Axios and Redux Toolkit to centralize data access across multiple forms
- Integrated 10+ AntD charts to display data according to business requirements
- Implemented role-based access control (RBAC) and navigation across 10+ ERP modules, improving user workflow efficiency, and reducing unauthorized access incidents

MERN Stack Developer

WeSudo

01/2023 - 06/2023 | Karachi

- Built 10+ CRUD APIs using Node.js and Express.js
- Created Grammar Correction App using React.js, Node.js, and Integrated 2 third-party API for plagiarism
- Converted 3+ Figma designs into pixel-perfect, cross-browser compatible responsive websites
- Enhanced accessibility compliance through customizable themes, typography controls, and contrast settings, improving usability by 95%
- Engineered a Shopify application integrated with Shopify APIs, automating store workflows and improving merchant productivity by 25%
- Developed backend services and database models for accessibility products, ensuring scalable API performance and maintained 100% code structure

PROJECTS:

Portfolio Website and AI-Powered Assistant — RAG-Based AI Agent

MERN Stack Developer | RAG & Generative AI

Developed a custom website with AI-Powered RAG-Based AI Assistant from scratch

01/2022 - Present

- Designed and implemented an AI-powered conversational assistant for my personal React portfolio, allowing visitors to ask questions about my skills, experience, projects, and technical background.
- Built a Retrieval-Augmented Generation (RAG) pipeline using Google Gemini embeddings, MongoDB, Node.js, and Express.js to provide responses based on portfolio-specific knowledge rather than relying only on the model's general knowledge.
- Developed product filtration and Cart functionality, allowing users to easily search and filter products based on their requirements, add products to their cart, update quantities, and manage their selected items before checkout.
- Implemented the complete flow: React Chat UI → Node.js/Express API → Query Embedding → MongoDB Similarity Search → Relevant Context Retrieval → Gemini Response Generation.
- Integrated Gemini's gemini-embedding-001 model to generate embeddings for both knowledge documents and incoming user queries.
- Developed backend API endpoints for health checks and knowledge/AI functionality and connected to the React frontend with the deployed backend API.
- Configured environment variables, CORS, MongoDB Atlas, and deployed the backend on Vercel.
- Improved the chatbot UX by implementing suggested questions, dynamic responses, and frontend state handling for the conversational interface.

E-Commerce Website and Dashboard

MERN Stack Developer

Architected a custom e-commerce website and dashboard from scratch

08/2025 - Present

- Implemented Google Authorization for secure login, allowing users to quickly and securely access their accounts using their Google credentials without going through a lengthy registration process.
- Integrated a secure Payment Gateway, enabling users to complete online purchases smoothly and securely through the website's checkout process
- Developed product filtration and Cart functionality, allowing users to easily search and filter products based on their requirements, add products to their cart, update quantities, and manage their selected items before checkout.
- Built an Admin Dashboard to manage website content, categories, and products, providing administrators with a centralized interface to add, update, delete, and organize products and website information.
- Implemented real-time WebSocket notifications and Push Notifications, allowing users to receive instant updates while using the application as well as notifications for important background activities.

SKILLS & TOOLS:

HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, Responsive Design, WordPress, Shopify, Material-UI, AntD, ShadCN, MongoDB, Express.js, React.js, Node.js, Next.js, React Router, Axios, REST APIs, API Integration, WebSocket, Postman, OAuth, JWT Authentication, Redux, Zustand, Context API, Firebase, Google Analytics, React Native, Git, GitHub, Agile/Scrum, CI/CD, Vercel, RAG, Gemini API, Embeddings, Vector Similarity Search, AI Agents, Prompt/Context Engineering

EDUCATION & QUALIFICATION:

Hybrid Web and Mobile Application Development

Sir Adamjee Institute of Management Science

2022 - 2023 | Karachi

Courses

Module A: Frontend Development

HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, Firebase, GitHub

Module B: MERN Stack Development

MongoDB, Express.js, React.js, Node.js, React Native, REST APIs, API Integrations

Intermediate in Commerce

Government Premier College

2013 - 2016 | Karachi

Courses

HSC Part I:

Principles of Commerce (POC), Principles of Accounting, Business Mathematics, Economics, English, Urdu

HSC Part II:

Principles of Banking (POB), Principles of Accounting, Business Statistics, Geography, English, Urdu

Matriculation in Computer Science

Hill Crest School System

2011 - 2012 | Karachi

Courses

SSC Part I:

Computer Science, Chemistry, Pakistan Studies, English, Sindhi

SSC Part II:

Computer Science, Physics, Chemistry, Mathematics, Pakistan Studies, English, Islamiyat, Sindhi
